About Us

Established in 2001, National Wooden Packing is one of the leading manufacturer of wooden packing products.

With over a decade of experience in the wooden packing Industry there has been no looking back since then. Today we have become one the key organization to supply professional, personalized products and end to end packing services.

Our pro-active approach and active involvement with the customers for all their packing needs has earned the trust and confidence of our valuable customers.

Man & Machine Unit

Our state of the art manufacturing facility that sprawls on the large land area, is installed with both man & machinery along with other facilities that really help us deliver within the committed time period.

We have imported machines like Vertical saw machines, Horizontal saw machines, Wood planer machine, Sending machine, Glanding machine, Circular machines etc. that help us churn out over a 5000 pallets in a week.

Quality Control For Global Shipping

The packing materials are in both standard and custom dimensions with superior finish and built to last. We're devoted to fabricate first class industrial wooden packing items according to ISPM-15 standards.

We ensure that at every step there is a check on the different process in order to adhere to international quality standards.

Why Us !

With the state of the art manufacturing facility, a team of dedicated staff and a focused approach to satisfy the needs of the customers, we ensure quality production, personalized packing solutions and timely delivery every time. Our ethical business practices, easy payment modes, transparent dealings and unmatched quality products have lead us to new openings by references from our existing clientele.

Array of Packing Products

We offer high quality Two Way Pallets and Four way Pallets which are an ideal choice for packing & transporting material bags, drums and boxes.

Manufactured from hardwood, rubber wood or pinewood as per companies' requirement, these pallets have the facility of getting lifted from two sides or all four sides, which brings further ease in carrying and loading material.
